

## Frequently Asked Questions

### **What Perlabella products are now available?**

We offer four Perlabella skin-care products that use natural ingredients to counter the effects of aging:

- Retinol Face, a pure form of Vitamin A that diminishes fine lines and wrinkles and stimulates collagen production for smoother, firmer and healthier skin.
- Q10 Face, a natural anti-aging serum made from the coenzyme Q10 that helps repair and regenerate skin, while protecting against signs of aging.
- Vitamin C Face, a highly concentrated dose of pure Vitamin C that protects the skin against ultraviolet (UV) light and can also make wrinkles appear less noticeable. It includes Vitamin E, which helps to moisturize, and light-reflecting pigments to give skin an illuminated effect.
- Retinol Eye, a pure form of Vitamin A that promotes healthier skin cells, stimulating collagen production, smoothing the wrinkles around the eyes and giving the appearance of firmer skin.

### **Where can I purchase Perlabella products?**

Perlabella products are now available at Walgreen's stores and online at Walgreens.com and amazon.com. They will be coming soon to many other retailers.

### **What makes your products different?**

The key differences are strength and purity. Our unique skin care products use PureDose Pearls to deliver the highest concentration of anti-aging ingredients available over the counter. To ensure purity, the airtight pearls are sealed in the production process, making it impossible for water, air or preservatives to compromise the integrity of their ingredients.

### **Can you combine these anti-aging products?**

Yes. Because they work in different ways, our Perlabella products can easily be combined to achieve younger, healthier-looking skin. We suggest you use the Vitamin C Face in the morning and the Retinol products in the evening.

### **What are the results of your products on the skin?**

Aging, the sun, smoking and many other factors can damage the skin, causing it to lose radiance, elasticity and tone. All Perlabella products have been carefully developed to target the symptoms of aging, making it possible to prevent and even repair skin damage that occurs later in life.

### **Are your products helpful for acne-prone skin?**

Yes, our customers tell us that our Retinol Face product helps improve acne-prone skin.

### **Can your products also be applied to the neck and chest?**

Yes. Our products can reduce the effects of aging skin in these areas as well as the face.

### **Can you use divide one PureDose Pearl and use it for both morning and afternoon?**

No. Each PureDose Pearl is intended for one application, either in the morning or evening. If you would like to apply it twice a day for one week, you will need to buy two packages of our 7-count pearls or our larger package of 28 pearls.

### **Can you use a separate alpha hydroxyl acid product along with Perlabella Retinol Face?**

No. We advise against using alpha hydroxyl acid and Retinol products at the same time.

### **Do Perlabella products clog facial pores?**

No. We have developed an advanced Microsponge technology that uses tiny silicone spheres to deliver the active ingredients. This helps smooth wrinkles, without clogging pores like mineral oil or petroleum-based cosmetic products.
